**AFFIDAVIT IN SUPPORT OF APPLICATION
FOR A SEARCH WARRANT FOR US MAIL PARCELS**

Your Affiant, Douglas Heneger, United States Postal Inspector, Baltimore, MD, being duly sworn, hereby deposes and states as follows:

I. Subject Parcels.

1. This is an Affidavit submitted in support of an Application for a Search Warrant for six (6) subject US Mail Parcels, hereinafter "Subject Parcels," or "SP." These subject parcels are currently located at the Incoming Mail Facility, in Linthicum Heights, Maryland. Those subject parcels are specifically identified as follows:

<i>Subject Parcel</i>	<i>Express (E) or Priority (P) and Tracking ID number</i>	<i>From: Name and Address</i>	<i>To: Name and Address</i>
1.	(P) 9570100035187213000130	(No Name) 39789 Longleaf St. Temecula, CA 92591	Jessica Beal 3921 Glenhunt Rd. Baltimore, MD 21229
2.	(P) 9505516331127217148311	Jill Fuersich 221 E 82 nd 1C New York, NY 10028	Kip Leathers Matt Duncan 12920 Summit Ridge Ter. Germantown, MD 20874
3.	(P) 9505510402867217077611	Ramona Dela Rosa Box 30018 65 Inf Sta San Juan, PR 00929	Dorka Cam Pusano 5408 Quintana St. Riverdale, MD 20737
4.	(E) EL347132170US	Peter Johnson 1145 Royal Rd. Baton Rouge, LA 70802	Victoria Kilchel 550 Light St. Baltimore, MD 21202
5.	(E) EL875291051US	Robert Jacison 844 Seaman Ave. Baldwin, NY 11510	Chris Moss 15407 Glastonbury Way Upper Marlboro, MD 20774

II. Affiant's Training and Experience

2. Your Affiant, Douglas Henegar, has been a United States Postal Inspector since April 2012 and has completed 12 weeks of basic investigative training, which included the investigation of narcotics related offenses. Your Affiant routinely investigates the use of the US Mail to ship narcotics and narcotics proceeds to and from the Baltimore/Washington area from the known narcotic source areas of Florida, Georgia, California, Arizona, Texas and Colorado (among others). As a result of your Affiant's training and experience, your Affiant is aware that Express Mail and Priority Mail services are regularly used by narcotics traffickers to ship controlled substances and bulk cash through the US Mail.

3. Based upon my training and experience in the field of narcotic interdiction through the mails, I know that there are suspicious characteristics common to many packages that contain narcotics, controlled substances or the proceeds thereof (i.e. US currency). These factors, more fully detailed below, are used to identify packages requiring further investigation. In the case of this search warrant, several of these factors were identified, and the package was alerted to by the drug detection canine. The most common factors or suspicious characteristics routinely observed in the course of screening packages are as follows:

a. *Contrasts observed between legitimate business parcels and drug parcels:* As an alternative to First Class Mail (which does not provide a customer with the capability to track the progress of a parcel through the system), the US Postal Service offers Priority Mail Express and Priority Mail. Priority Mail Express is guaranteed (money back) to be delivered on a set date and

time, usually overnight. (That deadline is determined at the time of mailing.) The customer receives a receipt with this guaranteed information, and the sender can opt for a signature requirement at the other end or not. Customers can track the parcel on line by its distinct Priority Mail Express tracking number. The weight of the package and the distance traveled are the two main factors in setting the price. Priority Mail Express costs more than Priority Mail. Priority Mail has a delivery service standard of 1-3 business days, but delivery within that time period is not guaranteed. Priority Mail is a less expensive alternative to Priority Mail Express, but still provides the ability to track a parcel. Legitimate businesses using Priority Mail Express typically have a business or corporate account visible on the mailing label, which covers the cost of the mailing. In contrast, the drug distributor will pay for the cost of mailing the package at the counter by using cash or a credit card. Business Priority Mail Express parcels typically weigh no more than 8 ounces, and business Priority Mail parcels typically weigh no more than 2 pounds. Drug packages typically exceed these weights. Address labels on business parcels are typically typed, whereas those on drug packages are typically hand written. In your affiant's experience, it is fairly easy to separate out smaller parcels, which constitute 70% to 80% of all Priority Mail Express and Priority Mail parcels, from other, heavier parcels. Typically, drug traffickers use Priority Mail Express, and will opt out of the requirement of obtaining a signature upon delivery.

b. *Invalid Sender/Return Address:* When drugs are shipped through the mail, the senders generally do not want them back. To distance themselves from parcels containing drugs, often the return addresses and the names of senders are fictitious or false. A fictitious or false address is anything from an incorrect zip code, to a non-existent house number or street. The name of the sender is also typically invalid in one of several ways. Your affiant has seen packages sent by persons with names of celebrities, cartoon characters, or fictional names. More often a

search of a law enforcement database reflects that there is no association between the name of the sender and the address provided.

c. *Invalid Recipient/Address:* It would be counter-productive to put the wrong receiving address on a package, but often the named recipient is not actually associated with the receiving address. This allows the person receiving the package to claim that they did not know about its contents. Sometimes drug packages are addressed to vacant properties with the expectation that the postal carrier will just leave it at the address. The intended recipient will then retrieve it from that location and hope to remain anonymous.

d. *Location of Sender:* The fact that a package was sent from narcotics source states such as Arizona, California, Texas, Washington, Colorado, Puerto Rico and Florida (among others) can also indicate that the parcel contains controlled substances.

e. *Smell:* The odor of cocaine, marijuana, and methamphetamine are distinct, and through experience postal inspectors are familiar with these odors. On occasion, a parcel will emit an odor that is easily recognized without the assistance of a canine. Other smells that suggest that a parcel may contain narcotics include the aroma of masking agents. Common masking agents used in an attempt to thwart detection by law enforcement and canines typically include dryer sheets, coffee, mustard, and any other substance that releases a strong smell.

f. *Heavy Taping:* Heavily taped parcels are another factor that will suggest a drug parcel, because narcotics parcels are heavily taped in an effort to keep the smell inside and to forestall easy checking on the interior contents by lifting up a flap. For this reason, your affiant has also observed excessive glue on the flaps of narcotics parcels as well.

g. *Click-N-Ship:* The US Postal Service created Click-N-Ship as a service for frequent mailers and businesses who prefer printing address labels and purchasing postage from

their residence or business. Drug traffickers create Click-N-Send accounts as a means of giving a legitimate appearance to their drug mailings. They create the accounts using fictitious account information and often provide pre-paid credit cards as a means of payment, which are difficult to track. Drug traffickers often use legitimate business return addresses in states other than California and Arizona as a means to deter detection, as these other states are not usually considered "source" states for controlled substances. The postage labels are printed/typed, unlike the typical drug related mailing label which is handwritten.

4. It is your affiant's experience that when these factors are observed, a drug detection K-9 will likely "alert," next to the parcel, indicating that the dog has detected the presence of narcotics. As a result, these factors become a reliable way to profile the parcels being shipped every day.

5. The facts contained in this affidavit are based on my personal knowledge as well as that of the other agents involved in this investigation. All observations that were not made personally by me were related to me by persons with knowledge. This affidavit contains that information necessary to establish probable cause to support an application for a search warrant. This affidavit is not intended to include each and every fact and matter observed by or made known to agents of the government.

III. Probable Cause

6. The following factors or suspicious characteristics are present in each of the subject parcels:

<u>Subject Parcel</u>	<u>From Source</u>	<u>Weight:</u>	<u>Label:</u>	<u>Senders name associated with address? Yes / No</u>	<u>Recipients name associated with address? Yes / No</u>	<u>Canine Alert?</u>
1. Priority	Yes – CA	0 lbs 7 ozs	Handwritten	No	Yes	Yes – Riggs
2. Priority	Yes – NY	0 lbs 14 ozs	Handwritten	Yes	Yes	Yes – Riggs
3. Priority	Yes – PR	5 lbs 14 ozs	Handwritten	Yes	Yes	Yes – Riggs
4. Express	Yes – LA	0 lbs 3 ozs	Handwritten	No	No	Yes – Riggs
5. Express	Yes – NY	2 lbs 10 ozs	Handwritten	No	Yes	Yes – Riggs
6. Priority	Yes – NV	0 lbs 6 ozs	Handwritten	No	No	Yes – Riggs

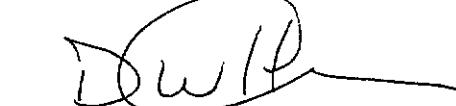

7. The suspicious characteristics listed above were identified while the subject parcels were in the mail stream. Therefore, on August 7, 2017, each subject parcel listed above was individually removed from the mail stream. At that point, law enforcement used standard protocol for canine detection to determine whether there was probable cause that the subject parcel contained narcotics. Specifically, after being removed from the mail stream, the subject parcels were placed in a secure area next to several other empty and unused boxes at the US Postal Service Incoming Mail Facility, located in Linthicum, MD. At that time, a narcotic detecting canine named “Riggs” was brought forward to scan the group of boxes, which included the individual subject parcels and the empty and unused boxes placed around the subject parcel. The handler observed the canine and then informed agents whether the dog alerted on the subject parcel. The canine handler for “Riggs” is Montgomery County Police Detective Scott Carson. “Riggs” was last certified in March 2017 and is trained on the odor of cocaine, heroin, black tar heroin, marijuana, and MDMA. Additionally, “Riggs” receives monthly recurrent narcotics odor detecting training

17 - 2134 BPG

to ensure her accuracy. This process was repeated for each and every subject parcel listed above. As indicated in the chart, the drug detection dog alerted to the presence of narcotics in the subject parcel each and every time.

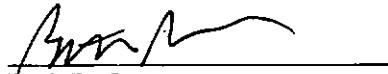

VI. Conclusion

8. Your affiant submits that based upon the above indicators reflected in the subject parcels described herein, based upon my training and experience, and based upon the alert of a trained canine on each subject parcel, I believe there is probable cause that each of the above-described subject parcels contain narcotics or controlled substances, or the proceeds thereof (i.e. US currency) and/or materials relating to the distribution of controlled substances through the United States Mail.

Douglas Henegar
United States Postal Inspector

Subscribed and sworn to before me this 11th day of August, 2017.

Beth P. Gesner
United States Magistrate Judge
